1Q26

# Kansas City Market Observations

## Labor Markets

- The region's labor market remained flat as macroeconomic conditions shifted. December's unemployment rate registered 3.9%, 50 basis points below the national average of 4.4%.
- Year-over-year, job growth was strongest in the Construction sector, followed by Education and Health. Business and Professional and Information posted the largest job losses over the past 12 months.
- Professional business and technology firms are reassessing their workforce needs, with local employment declining in two out of the three office-occupying sectors compared to the prior year.

## Leasing Market Fundamentals

- The market recorded 463,336 SF of net absorption during the quarter, bringing the past four-quarter total to 1.1 MSF. This marks the seventh consecutive quarter of positive absorption, driven by tenants capitalizing on favorable leasing conditions.
- The non-owner-occupied construction pipeline has remained inactive since the fourth quarter of 2018, with just 56,660 SF currently under construction.
- Vacancy decreased 60 basis points to 15.2% in the quarter and 130 basis points year-over-year. The trend is expected to continue towards 14.6% in 2026 as the market stabilizes and Class A product continues to experience strong leasing momentum.
- Average asking rental rates declined to \$22.87/SF in the quarter, but rates are expected to grow 2.50% to 3.25% by year-end 2026.

## Major Transactions

- Savion leased 34,100 SF of space on the fifth floor of the 156,530-SF 801 Penn building located in the CBD. This deal reflects a growing trend of increased leasing activity for spaces between 20,000 and 40,000 square feet, particularly in high-profile submarkets such as the CBD and South Johnson County.
- Rubin Brown leased 30,350 SF of space on the ninth floor of the 533,510-SF Thirteen + Main building located in the CBD. The firm is anticipated to move in by August 2026.
- Hollis + Miller Architects renewed its lease for 30,120 SF of space at Corrigan Station in the Freight House District.
- Alliance Shippers Inc. leased 23,300 SF at Antioch Plaza located at 6700 Antioch Rd. in Merriam, KS. The firm is anticipated to move in by August 2026.
- Hudson Insurance Group signed a new lease for 20,630 SF of space on the third floor of the 112,450-SF building located at 5901 College Blvd. in Overland Park, KS.

## Outlook

- Uncertainty in the macroeconomic outlook persists, prompting occupiers and investors to approach transactions with greater caution. However, most local tenants have finalized post-pandemic work strategies. Tenants will retain considerable leverage in lease negotiations given the elevated volume of available space.
- The conversion of office properties to alternative uses will help reduce obsolete inventory, tempering further vacancy increases.
- With the amount of debt coming due in the next 12-24 months, prime-located buildings are expected to trade as opportunistic investors can capitalize on the continued 'flight to quality' trend by adding amenities and modernizing the properties.

1Q26 KANSAS CITY OFFICE MARKET OVERVIEW

# Metro Employment Unemployment Rate Below National Average

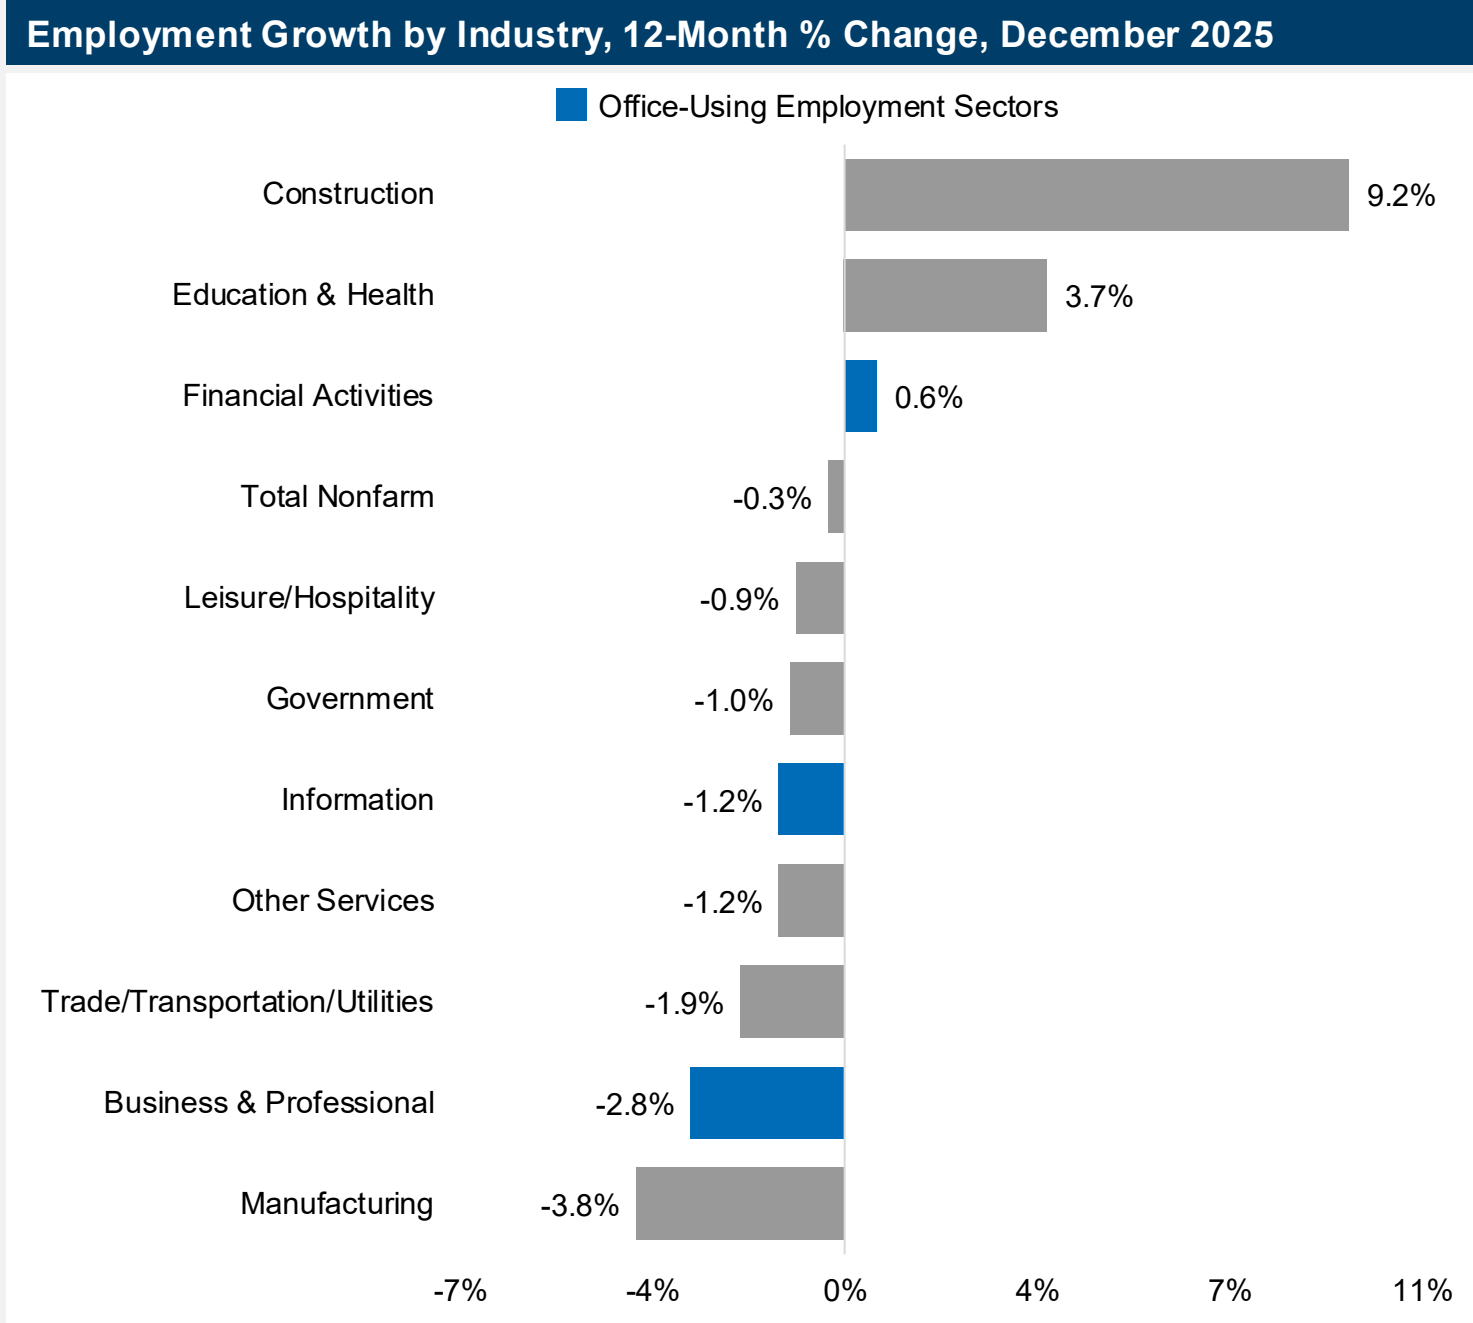

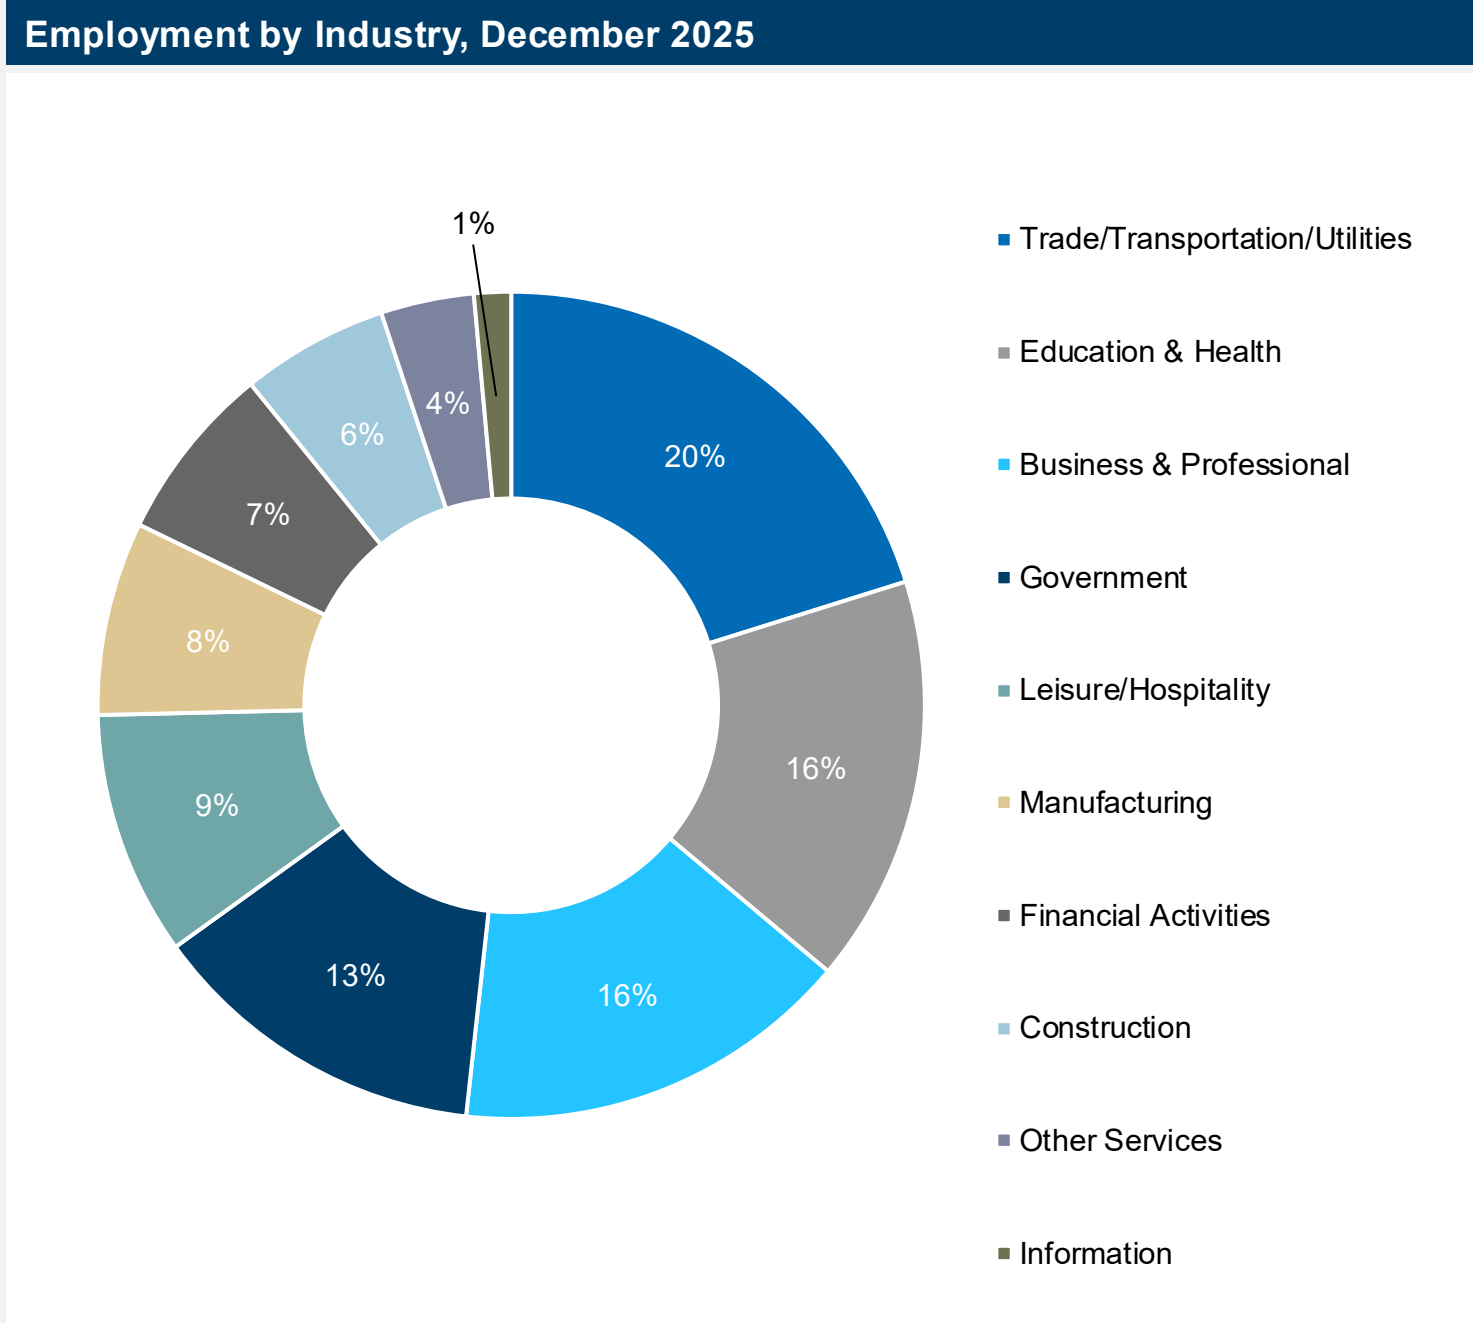

Due to a lapse in appropriations in the BLS, the collection of select data points has been delayed at the local or national level. The Kansas City region's labor market remained flat with unemployment registering 3.9% in December 2025. The regional unemployment rate now stands 50 basis points below the national average, signaling comparative economic strength. Nonfarm payroll employment in the region remains in negative territory at -0.3%. According to the Kansas City Fed Labor Market Conditions Indicators, activity declined from 0.30 to 0.17, while momentum increased from -0.07 to 0.02 in February 2026.

Source: U.S. Bureau of Labor Statistics, Newmark Research, Kansas City FED

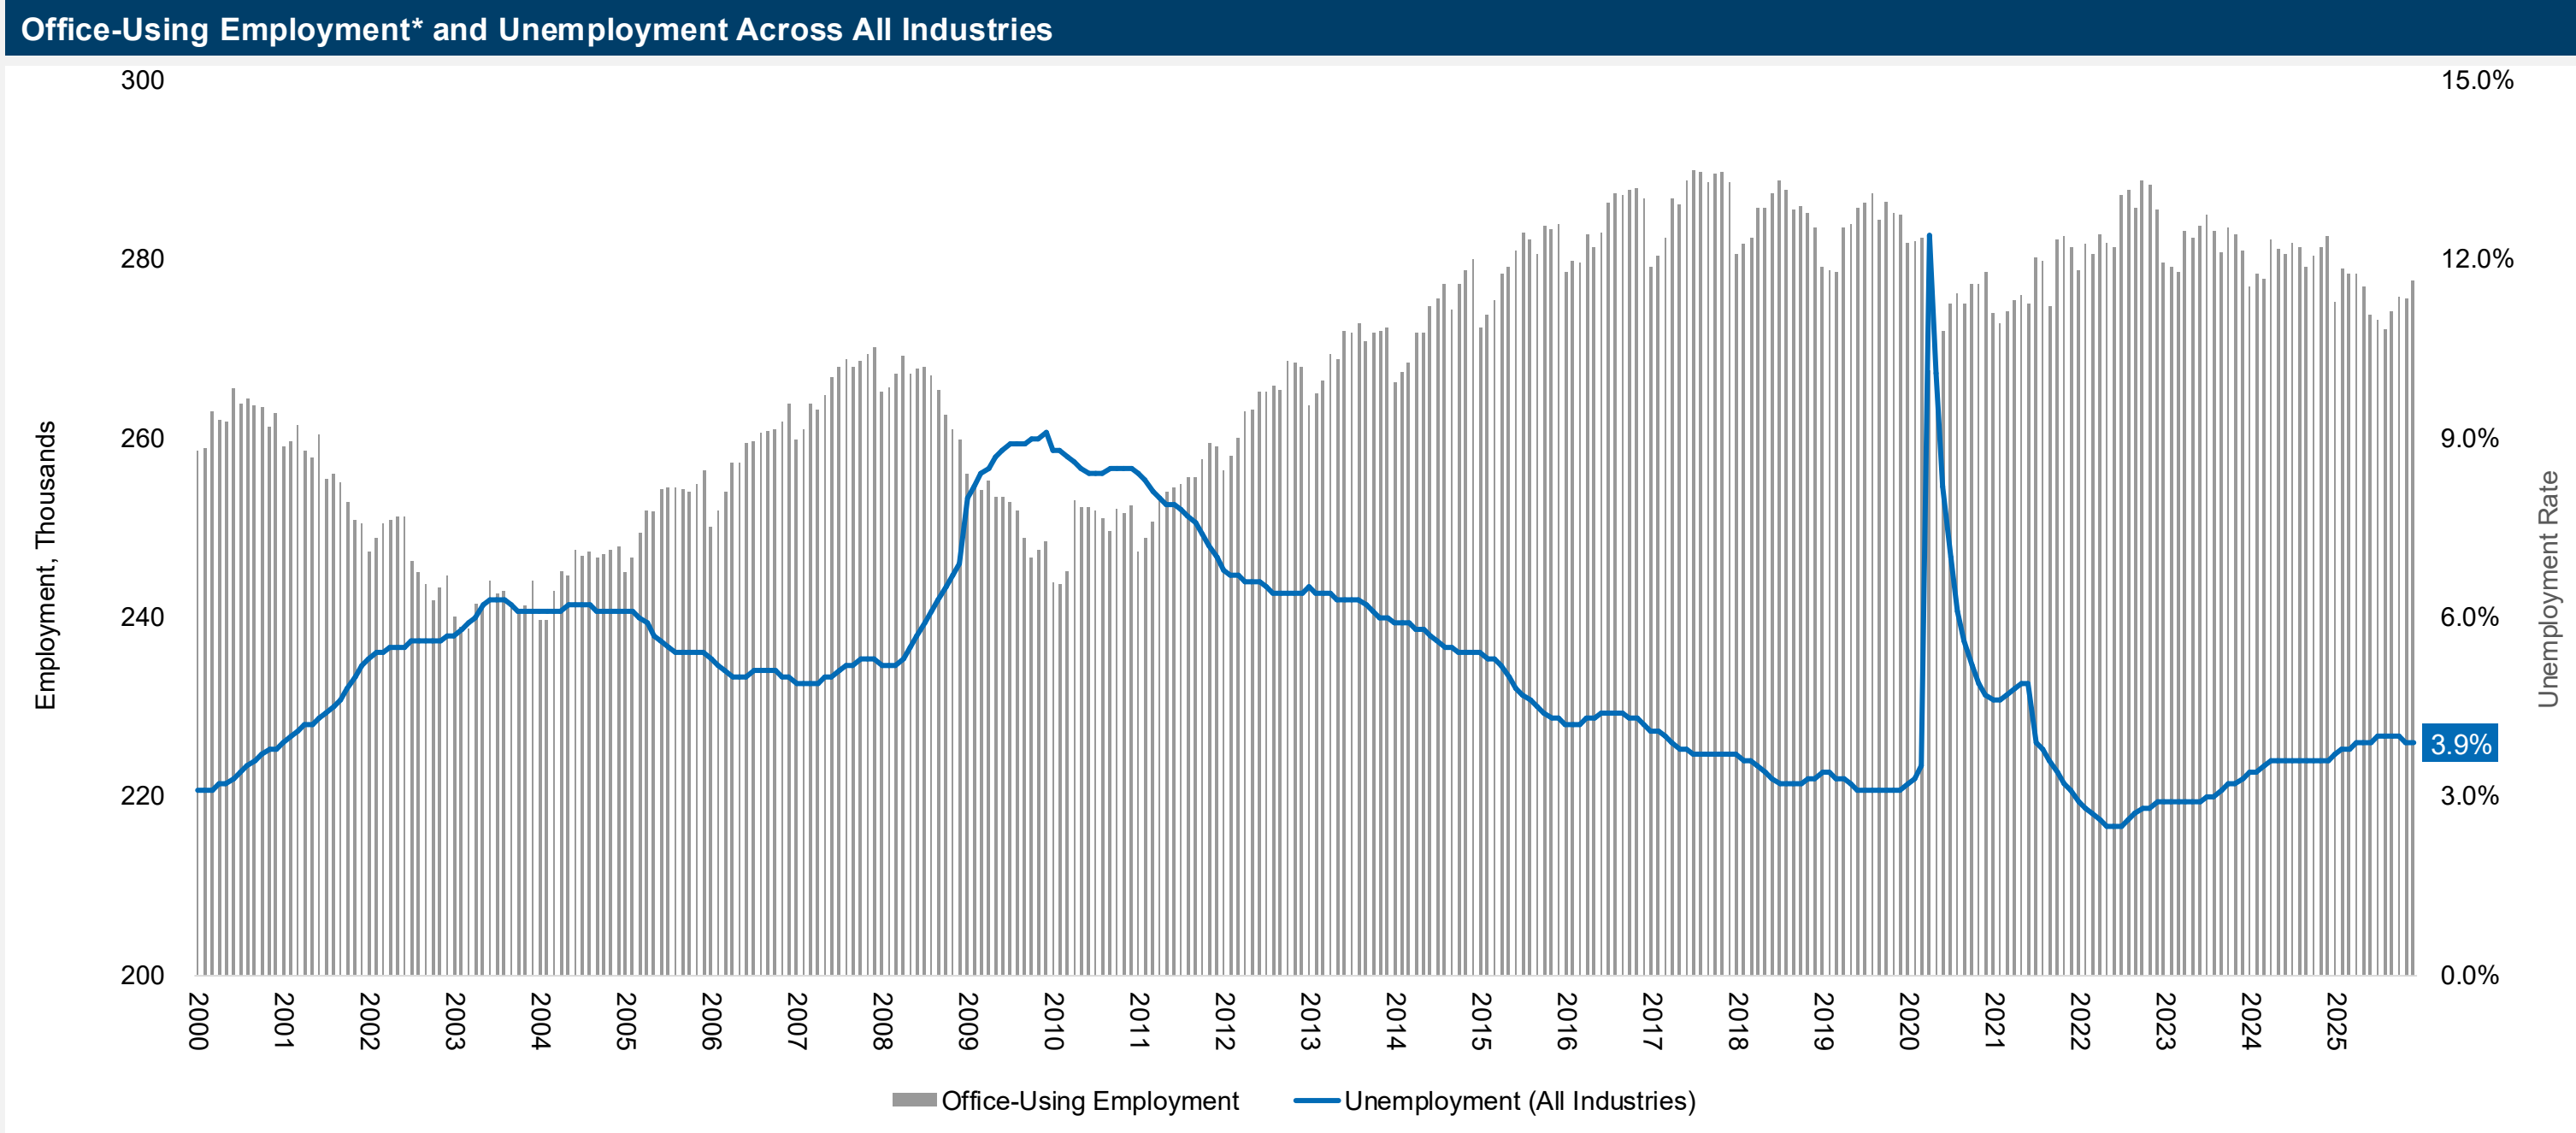

# Business and Professional and Information Sectors Lead Regional Job Losses

Due to a lapse in appropriations in the BLS, the collection of select data points has been delayed at the local or national level. The Construction sector led regional annual job growth, followed by Education and Health. The Business and Professional and Information sectors posted the largest annual job losses, with declines of 2.8% and 1.2%, respectively. Only one of the three office-occupying industries, Financial Activities, reported year-over-year job growth.

# Office Employment Trending Downward

Due to a lapse in appropriations in the BLS, the collection of select data points has been delayed at the local or national level. Office employment rebounded from its pandemic low but has trended downward since October 2022, now aligning with levels last seen in 2021. While a slight seasonal dip is typical early in the year, the region is expected to experience an increase in office employment in 2026.

Source: U.S. Bureau of Labor Statistics, Kansas City MSA

Note: December 2025 data is preliminary.

\*Office-using employment includes employment in the following industry sectors: Professional & Business Services, Financial Activities and Information.

Construction Starts	100	100	100

# Vacancy Declines to 15.2% Amid Seventh Consecutive Quarter of Positive Net Absorption

The vacancy rate declined 1.3 percentage points year over year to 15.2%, as most tenants have now established long-term workplace strategies. Office-to-multifamily conversions continue to lower vacancy as a combined 492,690 SF will be converted from the Centennial and Poindexter buildings in Downtown. Tenants are likely to retain significant leverage across most metro submarkets, prompting landlords to adopt more competitive leasing structures. With a substantial volume of debt maturing in 2026 and 2027, well-located assets are expected to trade, presenting opportunistic investors with the ability to capitalize on the ongoing “flight to quality” by upgrading amenities and modernizing properties.

# Leasing Activity Remains Above 19-Year Historical Average

Leasing activity is expected to remain above the 19-year historical average in 2026 as tenants pursue favorable long-term lease agreements. Momentum continues, especially in the Class A segment, as the market registered a total of 3.8 million SF of leasing activity during 2025. Kansas City’s leasing activity for the calendar year 2026 is projected to total between 3.9 million and 4.1 million SF.

# Tenants Locking-In Favorable Terms As Flight To Quality Continues

These conditions are similar to those seen in the previous quarter, but with a notable increase in the number of tenants locking in favorable terms. This is a sign of a flight to quality, as tenants seek out high-quality assets in a market that is becoming increasingly uncertain. The increase in favorable terms is also a sign of a flight to quality, as tenants seek out high-quality assets in a market that is becoming increasingly uncertain. The increase in favorable terms is also a sign of a flight to quality, as tenants seek out high-quality assets in a market that is becoming increasingly uncertain.

# Leasing Activity At Pre-Pandemic Levels In Marquee Submarkets

As lease activity in major markets has returned to pre-pandemic levels, leasing activity in marquee submarkets has also rebounded. This is particularly true in the office and retail sectors, where leasing activity has returned to pre-pandemic levels in many cases. This is a positive sign for the overall market and suggests that the economy is beginning to recover from the impact of the pandemic.

# Direct and Sublease Availability Trending Downward

Prior to the pandemic, many technology firms leased space in anticipation of future headcount growth, aiming to hedge against tightening supply and rising rents. While a significant portion of sublease availability was previously tied to tech firms, sublease space has since returned to pre-pandemic levels with sublease inventory projected to decline gradually toward 0.8% in 2026. The gap between vacancy and availability continues to narrow indicating an increased competition environment for available space in 2026.

# Northland Sees Largest Availability Rate Drop In Past Five Years

Availability rates have declined in five of seven markets over the past five years. In all the Northland markets of 2015, North Dakota's availability rate fell to 21.7%, followed by the Minnesota at 24.2%. South Dakota's rate remained the lowest rate at 1.2%. Overall, the North Dakota's availability rate fell from 28.5% in 2010 to 21.7% in 2015, a drop of 6.8 percentage points. The availability rate in the other four Northland markets fell by 1.5 to 2.5 percentage points, respectively.

# Speculative Construction Remains On Hold

Following the delivery of 1400KC at 1400 Baltimore Avenue in the second quarter of 2022 and the 190,380-square-foot CityPlace Corporate Center IV in the fourth quarter of 2023, non-owner-occupied construction activity has remained largely absent. Speculative development is expected to stay on hold through 2026, pending further declines in interest rates. In the current environment, developers typically require preleasing commitments of approximately 30% to 50% before initiating construction. Any speculative office announcements in 2026 are likely to be tied to mixed-use developments or medical office projects.

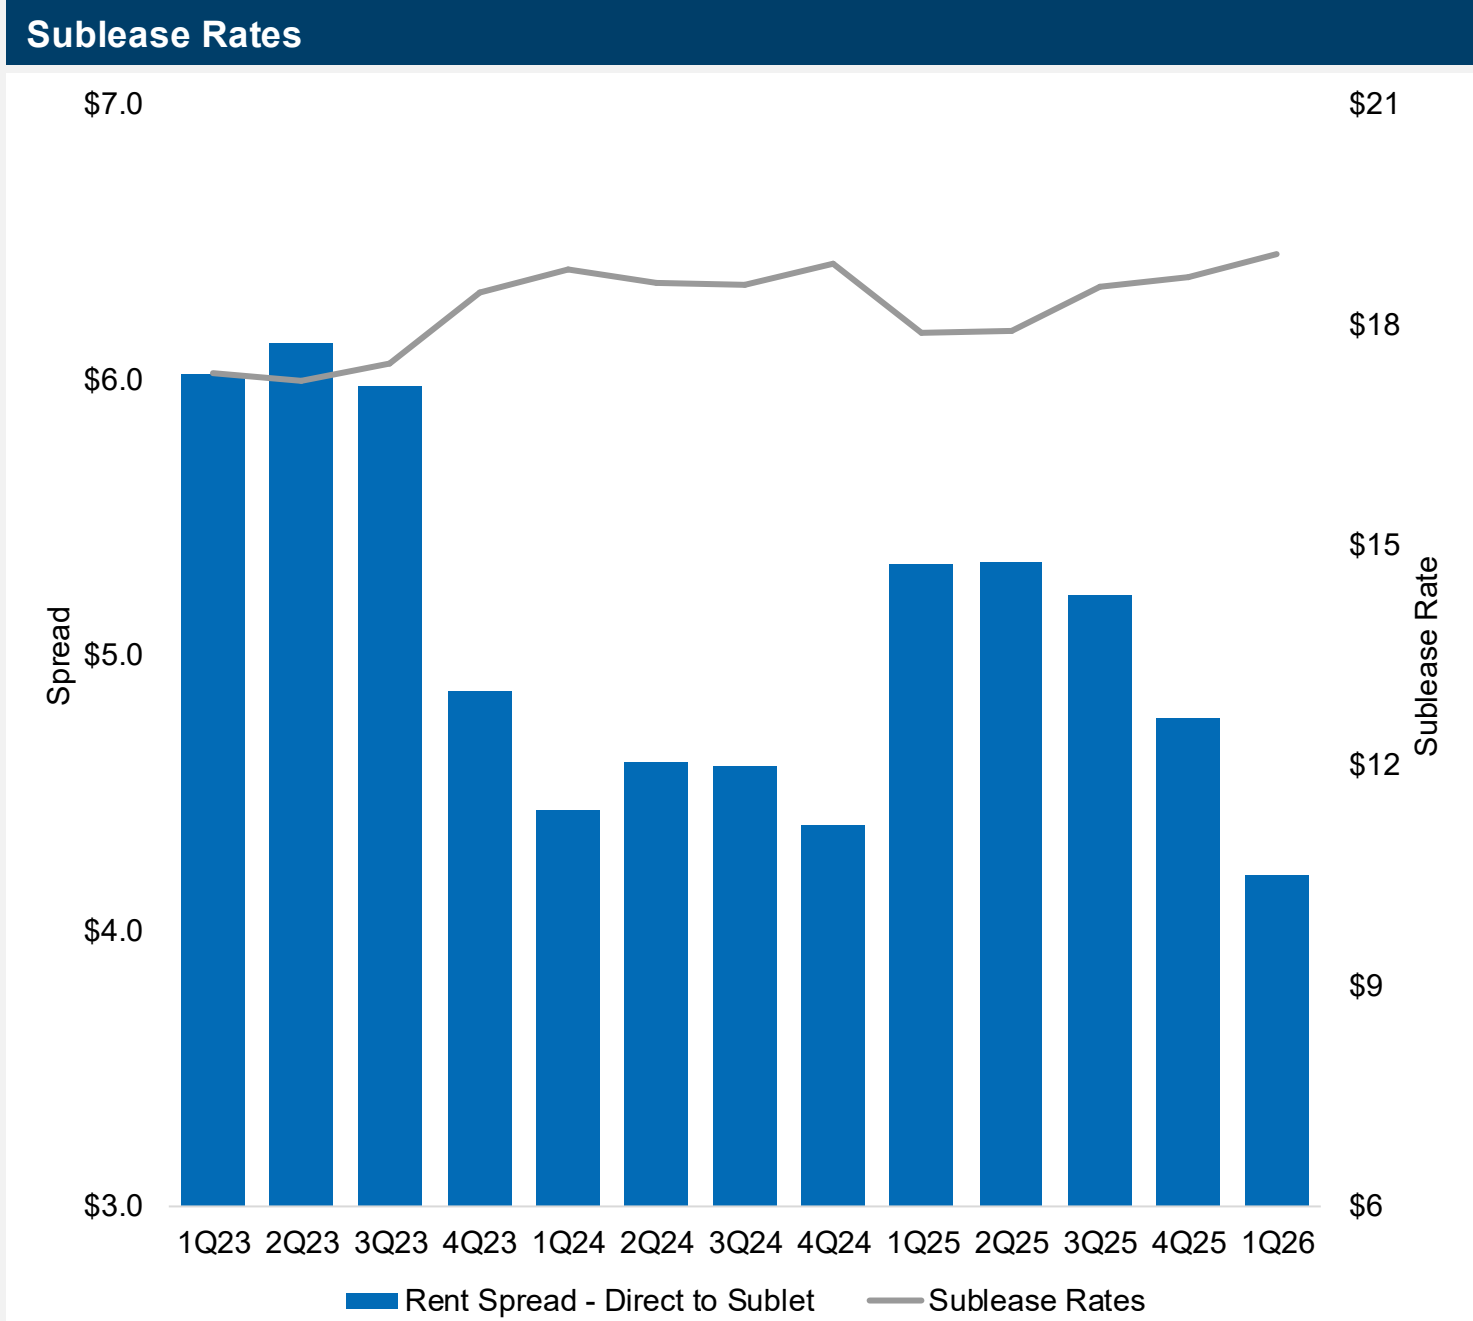

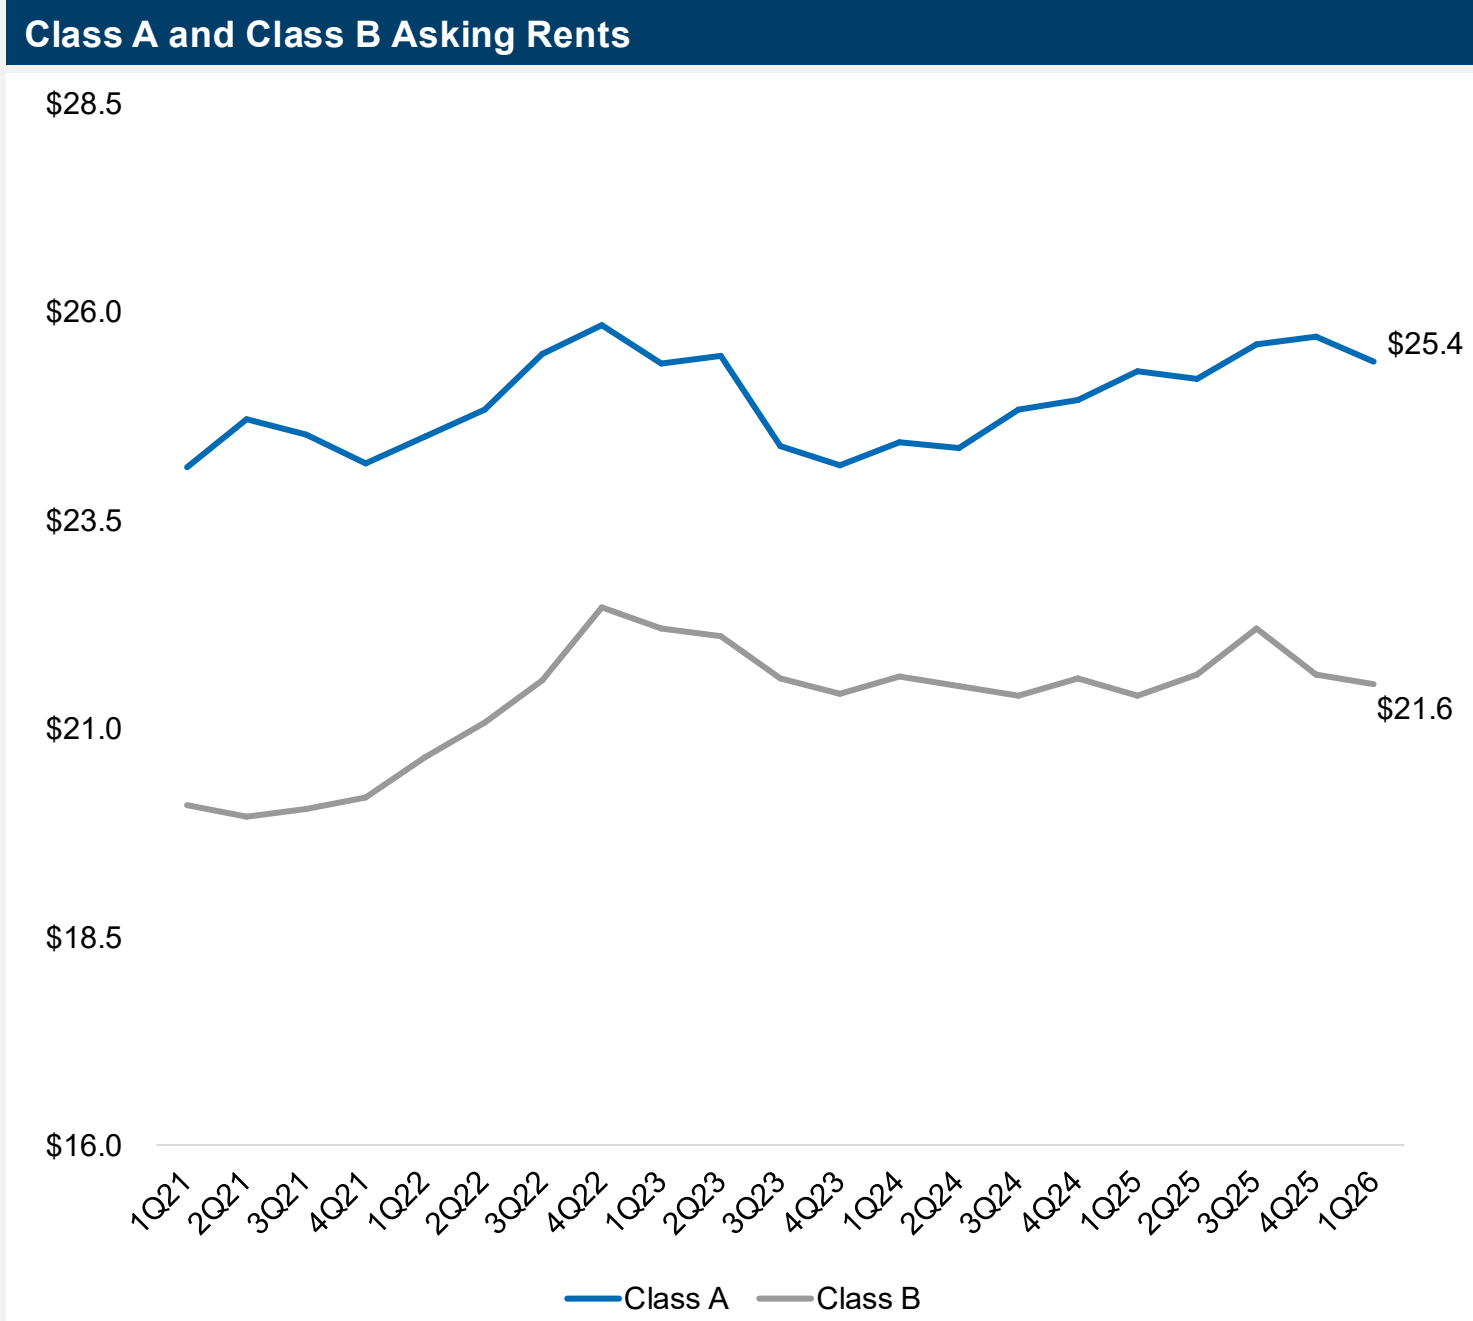

# Rents Climb To New Record High

Overall asking rates rose year over year, increasing 0.2% from \$22.83/SF to \$22.87/SF. The upward trend is counterbalanced, in part, as liquidity constraints prompt landlords to reduce rents rather than expand concession packages. New space listings and Class A offerings are estimated to push asking rental rates upwards at an annual average of 3.0% to 4.0% in the next four to six quarters.

# Class A Rents Up 5.2% Since 4Q23

In past market cycles, asking rents typically declined alongside weakened demand. Since the onset of the pandemic, however, rents have largely held firm, with secondary and tertiary markets like Kansas City continuing to see rent appreciation. Sublease rents have also increased over the past three years, driven by tenants capitalizing on favorable market conditions.

# Key Submarkets Drive Overall Rental Rate Growth

Over the past 12 months, average asking rents have increased across the market, with the strongest growth in submarkets like the Northeast. This is driven by a combination of factors, including a strong economy and a tight labor market.

# 1Q26 Notable News & Leasing Activity

New or newly renovated Class A office space with premium amenities is expected to see sustained demand over the next four quarters. In contrast, large multitenant Class B buildings may face challenges as small and mid-sized tenants downsize in favor of higher-quality options. Leasing activity is projected to increase as tenants pursue favorable long-term strategies in Class A and upgraded Class B+ properties.

Select News & Lease Transactions
